

## BDU-33 | BEX 11 PRACTICE BOMBS

BDU-33 Practice Bombs and BEX-11 (similar to MK-76) were designed for training in order to simulate the launching conditions of the General Purpose Bombs

BDU-33 contains a signal cartridge (MK-4 MOD3) to indicate, with a white smoke, the ground impact point.

BEX-11 is common used to simulate the launching of MK bombs.

It also uses a signal cartridge (SN-11) to indicate, with a white smoke, the ground impact point.

## BDU-33 | BEX 11 Practice Bombs

Características   Characteristics	BDU-33	BEX-11
Total length (mm)	571	571
Total weight (kg)	10.8	10.8
Cartridge	MK-4 mod3/GSP	SN-11
Max. Diameter (mm)	101.6	101.6
Cartridge cloud smoke	diam.: 1 m; Height: 6 m	diam.: 1 m; Height: 6 m
