

# AERIAL MK BOMBS MK 81, MK 82, MK 83, MK 84 STD-OTAN

Gespi General Purpose Bombs MK Series are an air-dropped low drag bomb used in aircraft bombing operation.

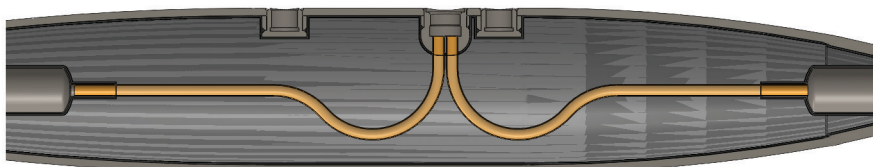

They are equipped with Electronic proximity or mechanical impact nose (M904) and tail (M905) fuzes to ensure reliability and produce explosion, blast and fragmentation effects.

The bombs are common used against artillery, bunkers, troops, POL, vehicles, buildings, etc.

## AERIAL MK BOMBS MK 81, MK 82, MK 83, MK 84

	GSP/MK 81	GSP/MK 82	GSP/MK 83	GSP/MK 84
Total length (mm)	1,781	2,168	2,896	3,687
Total Weight (Kg)	120	230	460	920
Explosive Weight (Kg)	45	98	202	467
Max. Diameter (mm)	228	273	356	457
Explosive	Tritonal / Comp B / TNT			
Boosters	M148 / M150 or similar			
Fuzes	M904 (nose) and M905 (tail)			
Suspension System	OTAN – 14in			OTAN – 30in
Stabilizers	Low drag fins			
Shelf life	10 years
